- Movement 100 Cochlear Implants (M100CI) means a movement to get donation of 100 Cochlear Implants. It was formed by The Indonesian EHC Central Committee on **World Hearing Day 3 March 2021**
- In Indonesia, the handling of Congenital Deaf Children still has 'missing links'
- Implant Cochlea that very importantly needed is still not provided by the Government.
- The purpose is to provide Cochlear Implan and HA for Congenital Deaf children from poor families so that they can be helped to be able to hear, talk and can gain knowledge to have a bright future as normal people.
- After one year from WHD 2021 to WHD 2022, we were able to provide Coclear Implan (CI) for 8 Congenital deaf children.
